### Skills

- HTML5 | CSS3 | JS | Bootstrap
- GitHub
- Responsive Web Design

---

### Projects

---

#### My E-Portfolio | [Website](#) | [GitHub](#)

I created a highly adaptable e-portfolio that seamlessly adjusts to PC, tablet, and smartphone screens. By utilizing HTML and CSS, I ensured a smooth and user-friendly experience. I enhanced the portfolio with engaging animations, giving it an elegant and polished appearance. Additionally, I included screenshots and links to my other projects, making it a comprehensive display of my work.

#### Microsoft Homepage Clone | [Website](#) | [GitHub](#)

Created a fully responsive clone of the Microsoft Homepage using HTML and CSS, delivering a seamless browsing experience across PC, tablet, and phone screens. Incorporated JavaScript features to enhance navigation, ensuring smooth and interactive functionality for users.

#### Barbershop Landing Page | [Website](#) | [GitHub](#)

Designed a four-section, fully responsive website for a barbershop business (for illustrative purposes) using HTML and CSS, ensuring a smooth browsing experience across desktop, tablet, and mobile devices.
